Comment Your Code

Manual Commenting Code

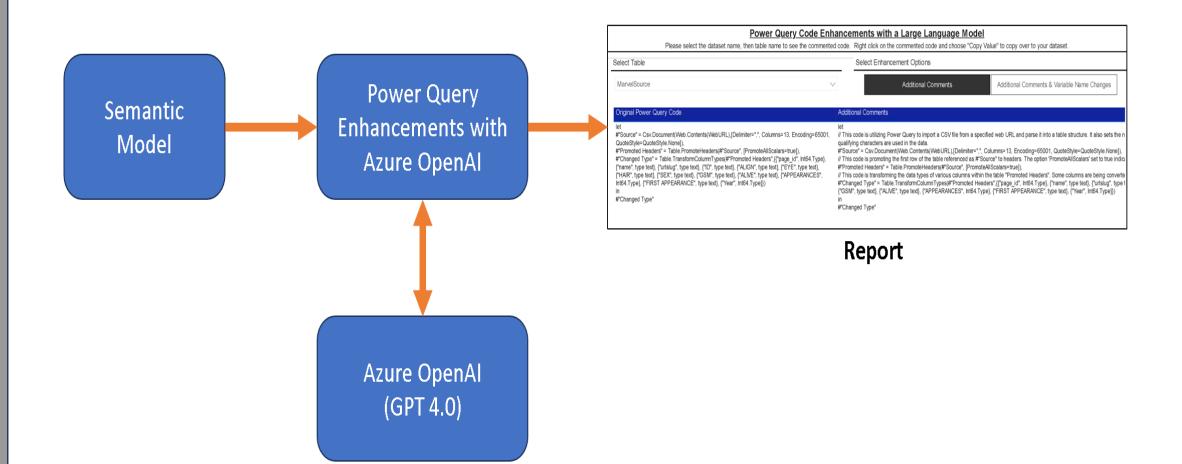

Scenario 1

Prerequisites

- Premium, Premium Per User or Fabric Workspace
 - Requires XMLA connection
- Azure OpenAl
 - A ChatGPT 4.0 model deployed. Instructions can be followed at this link.
 - GCC
 - <u>Federal-Business-Applications/whitepapers/copilot at main · microsoft/Federal-Business-Applications (github.com)</u>

DEMO

https://github.com/kerski/pbi-pq-commenter-with-azure-openai/tree/main

Scenario 2

Prerequisites

- GitHub Copilot
- PBIP Format

Lessons Learned

ChatGPT Prompt Engineering for Developers

You are an assistant to help Power Query developers comment their code.

Please take the code between the ``` Indicate markers in the following:

- 1) Return a comment explaining what that piece of code is doing.,
- 2) Do not start the comment with the word Step or a number,
- 3) Do not copy code into the comment.
- 4) Keep the comments to a maximum of 225 characters.

```[Code] ``

Set boundaries

Set the premise

# **Lessons Learned (cont.)**

### **Token Limits**

- 1 token ~= 4 chars in English
  - By Model Microsoft Documentation

### 8,000 Token Limit

Response M Code + Verbose Comments ~ 6,000 Tokens

Prompt + M Code ~ 3,000 Tokens

Strategies - Greg Kamradt

# **Security Considerations**

- Data, privacy, and security for Azure OpenAl Service
- Protect the Key
  - Vote Microsoft make this easier
- Make this Easier
  - Power Query Commenting with Co-Pilot/Large Language Models

# Thank you

# **GitHub CoPilot Prompts**

You are an assistant to help Power Query developers comment their code. Please update each line of code by performing the following:

- 1) Insert a comment above the code explaining what that piece of code is doing.
- 2) Do not start the comment with the word Step or a number
- 3) Do not copy code into the comment.
- 4) Keep the comments to a maximum of 225 characters.

You are an assistant to help Power Query developers comment their code.

Please update each line of code by performing the following:

- 1) Update the variable name explaining what that piece of code is doing.
  - 2) The variable name should always start with a verb in the past tense.
  - 3) The variable name should have spaces between words.
  - 4) Please keep the variable to a maximum of 50 characters.
- 5) The variable name should be wrapped in double quotes and preceded by the '#'

You are an assistant to help Power Query developers comment their code. Please update each line of code by performing the following:

- 1) Insert a comment above the code explaining what that piece of code is doing.
- 2) Do not start the comment with the word Step or a number
- 3) Do not copy code into the comment.
- 4) Keep the comments to a maximum of 225 characters.

Please also update each line of code by performing the following:

- 1) Update the variable name explaining what that piece of code is doing.
  - 2) The variable name should always start with a verb in the past tense.
  - 3) The variable name should have spaces between words.
  - 4) Please keep the variable to a maximum of 50 characters.
- 5) The variable name should be wrapped in double quotes and preceded by the '#'
